Thank you for purchasing my Winter Themed Snowman Book Report package. I hope your students will enjoy it as much as mine have. All of the activities have been designed with an eye to clarity, student engagement and effectiveness in addressing the following Common Core State Standards:

This package is designed with options in mind. You may choose to have your students do all of the activities, or just those you have selected. You may copy student sheets on regular sized copy paper, larger paper or card stock. The final report can be stapled into a packet to hang on a bulletin board and/or hand in. Alternatively, the student can cut out the snowmen character and glue it to a large sheet of drawing paper and create a background around it that reflects the setting of the book. These snowmen are magic and will not melt, no matter how warm the setting! Your students might then staple other sheets from the project to the bottom of the drawing paper. The finished projects make a great bulletin board display to celebrate student learning.

While this project works well with any fiction picture book or chapter book, I have included a list of winter themed books at the end of the packet should you wish to fully embrace a winter theme ☺
